

REGISTRATON CODES

COLOUR	GCCF CODE (Old Code in Brackets)	EMS CODE
SOLID COLOURS		
Black	64 15	MCO n
Blue	64 16	MCO a
Red	64 15d	MCO d
Cream	64 17	MCO e
Tortie	64 21	MCO f
Blue Tortie	64 28	MCO g
White blue eyes	64 14	MCO w 61
White Orange eyes	64 14a	MCO w 62
White odd eyes	64 14b	MCO w 63
White Green eyes	64 14c	MCO w 64
SMOKE COLOURS		
Black smoke	64 36	MCO ns
Blue smoke	64 36a	MCO as
Red smoke	64 36d	MCO ds
Cream smoke	64 36f	MCO es
Tortie smoke	64 36e	MCO fs
Blue Tortie smoke	64 36g	MCO gs
CLASSIC TABBY COLOURS		
Black classic Tabby (Brown)	64 41 (64 20)	MCO n 22
Blue classic Tabby	64 41a (64 20a)	MCO a 22
Red Classic Tabby	64 41d (64 19)	MCO d 22
Cream Classic Tabby	64 41f (64 20f)	MCO e 22
Tortie Classic Tabby	64 41e (64 20e)	MCO f 22
Blue Tortie Classic Tabby	64 41g (64 20g)	MCO g 22
MACKEREL TABBY COLOURS		
Black Mac Tabby (Brown)	64 44 (64 20)	MCO n 23
Blue Mac Tabby	64 44a (64 20a)	MCO a 23
Red Mac Tabby	64 44d (64 19)	MCO d 23
Cream Mac Tabby	64 44f (64 20f)	MCO e 23
Tortie Mac Tabby	64 44e (64 20e)	MCO f 23
Blue Tortie Mac Tabby	64 44g (64 20g)	MCO g 23
SILVER CLASSIC TABBY COLOURS		
Black Silver Classic Tabby	64 41s (64 18)	MCO ns 22
Blue Silver Classic Tabby	64 41as (64 18a)	MCO as 22
Red Silver Classic Tabby	64 41ds (64 18d)	MCO ds 22
Cream Silver Classic Tabby	64 41fs (64 18f)	MCO es 22
Tortie Silver Classic Tabby	64 41es (64 18e)	MCO fs 22
Blue Tortie Silver Classic Tabby	64 41gs (64 18g)	MCO gs 22

REGISTRATON CODES

SILVER MACKEREL TABBY COLOURS		
Black Silver Mac Tabby	64 44s (64 18)	MCO ns 23
Blue Silver Mac Tabby	64 44as (64 18a)	MCO as 23
Red Silver Mac Tabby	64 44ds (64 18d)	MCO ds 23
Cream Silver Mac Tabby	64 44fs (64 18f)	MCO es 23
Tortie Silver Mac Tabby	64 44es (64 18e)	MCO fs 23
Blue Tortie Silver Mac Tabby	64 44gs (64 18g)	MCO gs 23
SILVER SHADED TABBY COLOURS		
Black Silver Shaded Tabby	64 43s (64 75)	MCO ns 11
Blue Silver Shaded Tabby	64 43as (64 75a)	MCO as 11
Red Silver Shaded Tabby	64 43ds (64 75d)	MCO ds 11
Cream Silver Shaded Tabby	64 43fs (64 75f)	MCO es 11
Tortie Silver Shaded Tabby	64 43es (64 75e)	MCO fs 11
Blue Tortie Silver Shaded Tabby	64 43gs (64 75g)	MCO gs 11
<p><u>In the case of cats with white</u>, the above colour coding is used, the initial colour (one or two letters) is followed by a pair of numbers that denote the <u>AMOUNT</u> of white present on the cat.</p> <p>For cats with bib, paws and tummy (minimal white, to include white spotting) the code is 09. For cats with larger amounts of white (up to around 50%) the code is 03. (for most purposes, these two codes will cover all cats) For cats that exhibit a very large amount of white, above 50%, where colour is present as minimal patches, the code 02 is used, described as harlequin in other registries. For cats that only show colour around the ears and tail, the code for van should be used, 01.</p> <p><u>As an example:</u> Black = MCO n. Black and white (minimal white) = MCO n 09 Red Classic Tabby = MCO d 22 Red Classic Tabby and high white = MCO d 03 22 Blue Smoke = MCO as but Blue Smoke and White van pattern = MCO as 01</p> <p>*NB – 1. It should be remembered that these are REGISTRATION codes only. Breeders should check the allowable amount of white in cats for the show bench, by consulting the breed standard. For example, whilst a cat with white spotting is able to be registered with the code 09, where the white is LESS than the accepted showable minimum (white on all four paws, bib and tummy) it will not be accepted as meeting the standard for show. Similarly, van patterned maine coons are not accepted by GCCF for showing, and harlequins will need to have a fully coloured tail, and sufficient colour to show pattern on the body, which may not be the case.</p> <p>*NB – 2. Other tabby patterns are TICKED – which is denoted with the use of 25 instead of 22 or 23 or SPOTTED which is 24. Neither are accepted for showing in GCCF, but it allows for them to be tracked in pedigrees.</p> <p>*NB – 3. The numbers for eye colours can also be used for high white cats, or cats who show unusual eye colours, which although not showable under GCCF (odd eyes occasionally do occur, for example, in cats other than solid whites) it still allows for these traits to be followed in pedigrees etc.</p>
